GHANA ADVENTURES

Data Analysis Report & Business Insights

Booking & Customer Behaviour Analysis | October 2024 — February 2025

Prepared for: Ghana Adventures Operations Manager

1. Executive Summary

This report presents a comprehensive data analysis of Ghana Adventures booking and customer data covering the period October 2024 to February 2025. The analysis covers 91 bookings across multiple tour packages, destinations, and customer segments to provide actionable insights that will improve business performance, increase revenue, and enhance customer retention.

GHS 63,250	91	GHS 695	45.05%
Total Revenue	Total Bookings	Avg Booking Value	Repeat Customer Rate

2. Business Problem Analysis

2.1 Key Challenges Identified

Based on the data analysis the following key challenges are affecting Ghana Adventures booking consistency and customer retention:

- Inconsistent monthly bookings — revenue drops significantly in November (GHS 4,250) compared to December (GHS 15,100)
- 45% repeat customer rate — while decent, 55% of customers are not returning after their first booking
- Over-reliance on Travel Agency channel — 33% of bookings come through one channel creating dependency risk
- Underperforming tours — many tour packages generate less than GHS 500 in total revenue
- Untracked booking channels — some records have missing Booking Channel data reducing insight accuracy

2.2 Peak and Off-Peak Season Analysis

The data reveals a clear seasonal pattern in tour bookings:

Month	Bookings	Revenue (GHS)	Season
October 2024	10	GHS 5,950	Peak
November 2024	10	GHS 4,250	Off-Peak
December 2024	25	GHS 15,100	Peak
January 2025	28	GHS 17,100	Peak/Off-Peak
February 2025	18	GHS 14,100	Peak

Key Insight:

- December, January and February are the strongest months driven by festive season tours, New Year safaris and Valentine packages
- November is the weakest month with only GHS 4,250 in revenue — a clear off-peak period needing promotional attention
- Peak season generates GHS 39,950 (54.95%) vs Off-Peak GHS 23,300 (45.05%) showing relatively balanced demand

2.3 Tour Package Performance

Analysis of tour packages reveals a clear divide between high performers and underperformers:

Tour Package	Bookings	Revenue (GHS)	Performance
New Year Safari	2	GHS 3,600	★ Top
Safari Experience	2	GHS 3,000	★ Top
Volta River Cruise	3	GHS 2,550	★ Top
Christmas Safari	1	GHS 2,000	☑ Strong
Couples Safari	1	GHS 1,800	☑ Strong
Nzulezu Stilt Village	2	GHS 1,800	☑ Strong
Larabanga Mosque Tour	1	GHS 200	⚠ Low
Accra Museum Tour	1	GHS 200	⚠ Low
Aburi Gardens Retreat	1	GHS 300	⚠ Low

2.4 Customer Spending & Repeat Booking Patterns

Analysis of customer behaviour reveals the following patterns:

- 45.05% of customers are repeat bookers — indicating reasonable but improvable loyalty
- Private Tour bookings generate the highest revenue at GHS 31,700 (49.9% of total revenue)
- Group Tours account for 36 bookings but Individual bookings average a higher spend per person
- Repeat customers are more likely to book Private Tours suggesting higher spending loyalty segment
- Mole National Park is the top destination with GHS 12,000 in revenue driven by Safari packages

3. Data-Driven Approach

3.1 Customer Segmentation

Based on booking behaviour Ghana Adventures customers can be segmented into three key groups:

Segment	Characteristics	Recommended Action
Premium Explorers	Book Private Tours, Safari packages, GHS 1,000+ spend	VIP loyalty programme, early access to new tours
Group Travellers	Book Group Tours, budget-conscious, travel in teams	Group discount packages, corporate travel deals
Casual Visitors	One-time Individual bookings, lower spend	Re-engagement campaigns, first-return discounts

3.2 Key Metrics to Track

The following KPIs should be monitored monthly to support data-driven decision making:

Metric	Current Value	Target
Total Monthly Revenue	GHS 12,650 avg	GHS 18,000+ per month
Total Bookings per Month	18 avg	25+ per month
Repeat Customer Rate	45.05%	60%+ within 12 months
Average Booking Value	GHS 695	GHS 900+ per booking

Off-Peak Revenue Share	45.05%	48%+ (reduce seasonality)
Booking Channel Diversity	5 channels	Equal distribution across all 5

3.3 Recommended Tools & Reporting Methods

- Power BI Dashboard — interactive monthly reporting for management (already built)
- Monthly Performance Reports — automated Word/PDF reports from Power BI data
- Customer Database — CRM system to track customer history and preferences
- Google Analytics — track website and online booking performance
- Social Media Analytics — measure effectiveness of Social Media booking channel

4. Business Recommendations

4.1 Boost Off-Season Bookings — November Strategy

🎯 Problem: November is the weakest month with only GHS 4,250 in revenue
Launch 'November Explorer Deals' — 15-20% discount on selected tours during November
Create special November-only packages like 'Northern Ghana Cultural Weekend' targeting domestic travellers
Partner with schools and universities for educational tours during November school breaks
Offer early-bird Christmas Safari bookings in November with a small deposit to secure revenue
Run targeted Social Media campaigns promoting November as the 'hidden gem' travel month

4.2 Improve Customer Retention

🎯 Problem: 55% of customers do not return after first booking
Introduce a Ghana Adventures Loyalty Card — earn points per booking, redeem for discounts
Send post-trip follow-up emails with personalised tour recommendations based on past bookings
Offer a 10% returning customer discount on their second booking within 12 months

Create a WhatsApp VIP group for repeat customers with exclusive early access to new tours

Collect customer feedback after every tour and use it to improve service quality

4.3 Expand Top Performing Tours

The following tours should be prioritised for expansion and promotion:

- New Year Safari (GHS 3,600) — add a second departure date to accommodate more bookings
- Safari Experience (GHS 3,000) — promote year-round not just peak season
- Volta River Cruise (GHS 2,550) — create a premium weekend version at higher price point
- Couples Safari (GHS 1,800) — expand with Valentine, Anniversary and Honeymoon packages
- Mole National Park tours — highest revenue destination, develop 3-day package option

4.4 Discontinue or Redesign Underperforming Tours

The following tours need urgent review or discontinuation:

- Larabanga Mosque Tour (GHS 200) — too low priced, bundle with Northern Cultural Tour at GHS 650
- Accra Museum Tour (GHS 200) — combine with Accra City Tour and Accra Food Tour into full day package
- Aburi Gardens Retreat (GHS 300) — reposition as romantic day trip at GHS 500-600 price point

4.5 Booking Channel Strategy

Current channel performance shows over-reliance on Travel Agency. Recommended actions:

Channel	Current Revenue	Strategy
Travel Agency	GHS 17,550	Maintain relationships, negotiate higher commission rates
Online	GHS 12,950	Invest in SEO and Google Ads to grow online bookings
Website	GHS 12,700	Redesign booking flow, add live chat support
Walk-in	GHS 8,150	Improve office signage and walk-in experience

Social Media	GHS 9,500	Increase Instagram/TikTok content, hire content creator

5. Value of Hiring a Data Analyst

Here is a clear breakdown of how a Data Analyst will directly benefit Ghana Adventures:

Area	How a Data Analyst Helps
Revenue Growth	Identify which tours generate most profit and recommend pricing strategies to increase average booking value from GHS 695 to GHS 900+
Customer Retention	Track repeat customer behaviour, build loyalty segments and recommend targeted re-engagement campaigns to lift retention from 45% to 60%+
Seasonal Planning	Predict demand patterns to plan staffing, resources and promotions ahead of peak and off-peak periods
Marketing ROI	Measure which booking channels deliver best return on investment and allocate marketing budget accordingly
Tour Portfolio	Continuously monitor tour performance to expand winners and phase out underperformers before they drain resources
Data Quality	Ensure all bookings are recorded accurately so management decisions are based on reliable complete data

6. Pricing & Promotional Strategy

6.1 Tiered Pricing Strategy

- Economy Tier (GHS 200-400) — budget-friendly day trips for domestic travellers
- Standard Tier (GHS 450-800) — most popular range, highest volume of bookings
- Premium Tier (GHS 900-1,500) — private and luxury experiences for high-value customers
- Exclusive Tier (GHS 1,600-2,000+) — safari weekends, couples retreats, special events

6.2 Promotional Campaign Ideas

- 'Off-Season Adventurer' — 20% discount on November bookings with free airport pickup
- 'Bring a Friend' — refer a new customer and get 15% off your next booking
- 'Early Bird Safari' — book 60 days in advance for 10% discount on all Safari packages

- 'Ghana at Heart' — special packages for diaspora Ghanaians visiting home
- 'Corporate Explorer' — group packages for companies wanting team building adventures

7. Conclusion

The data analysis of Ghana Adventures reveals a company with strong fundamentals but significant untapped potential. The key findings show that Safari and Cruise packages are the highest revenue generators, December to February is the peak season, and Mole National Park is the top performing destination.

The primary opportunities for growth are improving off-season bookings particularly in November, increasing customer retention from 45% to 60%+, expanding top-performing tours and diversifying booking channels away from over-reliance on Travel Agencies.

By hiring a Data Analyst and implementing the recommendations in this report, Ghana Adventures can realistically target a 30-40% increase in annual revenue while building a loyal customer base that returns year after year.
